## Professional Summary

---

I'm a Computer Science undergraduate with a strong academic foundation and 2.5+ years of hands-on experience in developing scalable technology solutions. Proficient in Python, C++, and Java, with practical experience leading academic projects focused on algorithms, systems design, and database architecture. Currently deepening expertise in Machine Learning and Artificial Intelligence through internships, coursework, personal projects, and independent study. Passionate about leveraging AI to drive innovation and eager to contribute to impactful teams in Big Tech.

## Education

---

**Bachelor of Science in Computer Science (BS CS)** 2023 – Present

**Riphah International University, Islamabad**

**Relevant Coursework:** Artificial Intelligence, Data Structures & Algorithms, Cloud Computing, Software Engineering, Database Systems, and Mobile App Development.

Website: <https://riphah.edu.pk> | CGPA: 3.48/4.00 (6<sup>th</sup> semester Completed)

**Intermediate in Pre-Engineering (HSSC)** 2021 – 2023

**IQRA College of Science, Jehangira Dist. Nowshera**

**Basic Concepts:** Strong the basic concepts of Computer, Mathematics & Coding.

Grade: A

## Experience

---

**Artificial Intelligence Intern**

**Alpha Network (SMC-Private), Remote**

Aug 2025 – Sep 2025

In this program I perform very well, work as an Ai Engineer and Web developer and successfully develop an Ai Image Enhancer Web Application.

Website: <https://www.alphanetwork.com.pk/>

**Machine Learning Intern**

**Elevvo Pathways, Remote**

Aug 2025 – Aug 2025

I have done the major tasks including bonus tasks of Machine Learning (models training etc) using AI and ML Algorithms and techniques.

Website: <https://elevvo.tech/>

**Machine Learning Intern**

**CodeAlpha**

Jan 2026 – April 2026

Website: <https://www.codealpha.tech/>

**Machine Learning Intern**

**Arch Technologies, Remote**

March 2026 – April 2026

Website: <https://archtechnologiespk.wixsite.com/home>

## Projects

---

- Ai Image Enhancer – Python + Flask + Deep learning + OpenCV + SQLite + Numpy
- Traffic Sign Recognition – Python + Deep learning + Colab + TensorFlow
- Hangman Fun Game – Flutter + Dart + Stateful widgets + OOP concepts

## Skills

---

- **Languages & Frameworks:** Python, Java, C++, SQL, HTML, CSS, JavaScript, Tkinter, Assembly Language, Dart, TensorFlow, Flutter, Flask
- **Tools & Technologies:** MySQL, GitHub, Git, PyCharm, Google Workspace, Netlify, Visual Studio, Android Studio, VS Code, Google Colab, Microsoft 365, Formsfree, n8n
- **Concepts:** AI, Machine Learning, Deep Learning, OOP, UI/UX Design, Relational Databases, Data Analytics, Prototyping, UX research, Agentic AI, Computer Vision, Model Training, CI/CD, CNN, Supervised, Unsupervised & Reinforcement Learning, Automation, Web Scraping, DevOps
- **Soft Skills:** Problem Solving, Team Collaboration, Teamwork, Team Lead, Project Management, Communication, Critical Thinking, Creativity

## Publication

---

### **AI-Based Hair Loss Detection and Prevention System Using Lightweight CNN (AlphaNet)**

This research presents a lightweight Convolutional Neural Network (AlphaNet) designed for stage-wise hair loss detection using mobile-captured scalp images. A curated dataset of 1,402 ethically sourced images including Normal, Stage 1, Stage 2, Stage 3, Alopecia Areata, and Invalid classes was preprocessed using normalization, augmentation, filtering, and standardized resizing.

Asghar, M. T., & Co-Authors. (2025). AI-Powered Hair Loss Detection and Prevention System Using CNN-Based Scalp Image Classification and Mobile Integration. **Authors:** Muhammad Talha Asghar, Nadeem Khan, Mir Ahmad Shah | **Journal Name:** Cluster Computing | **Publisher:** Springer Nature

## Certifications

---

- [Microsoft AI & ML Engineering](#)
- [UX Design – Google via Coursera](#)
- [Engaging Stakeholders for Success – Cisco NetAcad](#)

## Languages

---

- English | Pashto | Urdu
